Quarterly Financial Report

Third quarter (Q3) – February to April 2014

Management Discussion and Analysis

The following discussion and analysis of the operating results and financial position of the Canadian Dairy Commission (CDC) for the quarter ending April 30, 2014 should be read in conjunction with the financial statements enclosed herein and the 2012-2013 Annual Report.

1. Basis of Preparation

This discussion was prepared in accordance with the Treasury Board Standard on Quarterly Financial Reports for Crown Corporations (Treasury Board Standard). This narrative discussion is not intended to be a full Management Discussion and Analysis (MD&A). Disclosures and information in the Canadian Dairy Commission's July 31, 2013 annual report are assumed to apply to the current quarter unless otherwise updated below.

The financial statements are unaudited and have been prepared in Canadian dollars in accordance with International Accounting Standard 34, Interim Financial Reporting (IAS 34) and the Treasury Board Standard. This narrative discussion and the accompanying financial statements were reviewed and approved by CDC Board of directors.

2. Financial Results

Domestic Activities

	Q3 ending April 30			YTD ending April 30		
(in thousands)	2014	2013	$ change	2014	2013	$ change
Domestic sales revenue	$ 39,151	$ 40,505	$ (1,354)	$ 189,692	$ 199,854	$ (10,162)
Cost of goods sold - domestic	$ 31,069	$ 35,623	$ (4,554)	$ 167,856	$ 186,008	$ (18,152)
Transport and carrying charges	$ 1,008	$ 1,429	$ (421)	$ 3,214	$ 3,874	$ (660)
Finance costs	$ 130	$ 254	$ (124)	$ 596	$ 773	$ (177)
Gross profit on domestic sales	**$ 6,944**	**$ 3,199**	**$ 3,745**	**$ 18,026**	**$ 9,199**	**$ 8,827**

Domestic sales revenues for the year to date ending April 30, 2014 decreased by $10.16 million or 5% compared to previous year's result. The variance is mainly due to lower sales of Plan B butter and imported butter. Although revenues decreased, the gross profit on domestic sales increased by $8.83 million compared the previous year's result. This is mainly due to obtaining a better return on Class 4(m) skim milk powder (SMP) sales to animal feed manufacturers. Transport and carrying charges were slightly lower than in the previous year due to lower inventory and lower sales quantity, as mentioned above.

Third quarter results for 2013-2014 show a gross profit on domestic sales of $6.94 million compared to $3.20 million for the same period last year, an increase of $3.74 million. The explanation for the variance is the same as the one provided above for the YTD results.

Export Activities

(in thousands)	Q3 ending April 30 2014	Q3 ending April 30 2013	Q3 ending April 30 $ change	YTD ending April 30 2014	YTD ending April 30 2013	YTD ending April 30 $ change
Export sales revenue	$ 20,776	$ 14,244	$ 6,532	$ 61,743	$ 32,747	$ 28,996
Cost of goods sold - exports	$ 19,648	$ 13,259	$ 6,389	$ 57,326	$ 31,028	$ 26,298
Transport and carrying charges	$ 656	$ 452	$ 204	$ 1,484	$ 941	$ 543
Finance costs	$ -	$ 2	$ (2)	$ 2	$ 20	$ (18)
Gross profit on export sales	**$ 472**	**$ 531**	**$ (59)**	**$ 2,931**	**$ 758**	**$ 2,173**

The gross profit on export sales for the year to date ending April 30, 2014, amounted to $2.93 million, a significant increase from the previous year's result. A larger volume of skim milk powder at higher selling prices was exported during the first nine months of the current dairy year, which explains the differences in revenues, cost of sales, as well as transport and carrying charges compared to the previous year.

Third quarter results for 2013-2014 show a slight decrease in the gross profit on export sales of $0.06 million compared to the same quarter in the previous year.

The CDC purchases surplus dairy products destined for export at prices that reflect the prevailing world market conditions at the time, with the intent of breaking even over the course of each dairy year. As these markets are difficult to predict, this activity may generate gains or losses throughout the year, but should break even by year-end

Other Revenues

(in thousands)	Q3 ending April 30 2014	Q3 ending April 30 2013	Q3 ending April 30 $ change	YTD ending April 30 2014	YTD ending April 30 2013	YTD ending April 30 $ change
Funding from milk pools	$ 1,267	$ 1,604	$ (337)	$ 4,402	$ 4,815	$ (413)
Funding from the Government of Canada	$ 790	$ 956	$ (166)	$ 2,981	$ 3,025	$ (44)
Audit services	$ 129	$ 76	$ 53	$ 149	$ 93	$ 56
Total Other Revenues	**$ 2,186**	**$ 2,636**	**$ (450)**	**$ 7,532**	**$ 7,933**	**$ (401)**

The funding from milk pools represents the revenues obtained from producers and the marketplace to finance a portion of the CDC's administrative expenses, the cost of production study as well as the carrying charges associated with the CDC butter stocks. The YTD results for 2013-2014 are lower compared to the previous year's due to an decrease in the butter carrying costs charged to the pool as a result of lower levels of butter inventories compared to the previous year.

Parliamentary appropriations for operating expenditures are recognized in the Statement of Operations and Comprehensive Income based on government-funded administrative expenses.

Revenues obtained for audit services relate to the milk plant utilization audits performed by the CDC in 6 provinces on a cost-recovery basis. Revenues from audit services are recognized when the service is rendered.

Operating and Administrative Expenses

	Q3 ending April 30			YTD ending April 30		
	2014	2013	$ change	2014	2013	$ change
Operating Expenses						
Industry initiatives	$ 307	$ 208	$ 99	$ 1,570	$ 567	$ 1,003
Cost of Production study	$ 220	$ 188	$ 32	$ 609	$ 651	$ (42)
Other charges (recoveries)	$ (1,213)	$ (157)	$ (1,056)	$ 6	$ (48)	$ 54
Total operating expenses	**$ (686)**	**$ 239**	**$ (925)**	**$ 2,185**	**$ 1,170**	**$ 1,015**
Administrative Expenses						
Salaries and employee benefits	$ 1,254	$ 1,339	$ (85)	$ 4,126	$ 4,259	$ (133)
Other administrative expenses	$ 374	$ 374	$ -	$ 1,266	$ 1,301	$ (35)
Total administrative expenses	**$ 1,628**	**$ 1,713**	**$ (85)**	**$ 5,392**	**$ 5,560**	**$ (168)**
Total operating and administrative expenses	**$ 942**	**$ 1,952**	**$ (1,010)**	**$ 7,577**	**$ 6,730**	**$ 847**

Operating Expenses

Expenses relating to “industry initiatives” increased by $1.00 million for the year to date ending April 30, 2014 compared to the same period of the previous year. This increase is mainly due to disbursements for the Scholarship Program which started in August 2011. Participating universities received 50% of their allocated funding at the beginning of the Program and since August 2013, they are entitled to receive the balance of their funding.

“Other charges (recoveries)” include amounts representing unrealized gains or losses on outstanding foreign exchange contracts as of the statement of financial position date. These gains or losses are determined using the difference between the contracted rates and exchange rates as of the statement of financial position date, applied to the contract amount. They vary with the movement of exchange rates as well as with the value of outstanding foreign exchange contracts at the end of the period.

Administrative Expenses

Total administrative expenses for the YTD ending April 30, 2014 decreased by $0.17 million compared to the previous year’s result.

The CDC has taken cost reduction measures to reduce its overall 2013-2014 administrative budget and implemented the 10% cut in government funding which took effect April 1, 2014.

Inventories and Loans

Inventory value as of April 30, 2014 was $102.89 million compared to $166.27 million as of April 30, 2013.

CDC butter stocks at the end April 2014 were lower compared to the same time last year as a result of a decrease in milk production. The overall skim milk powder stocks were also lower which contributed to the decrease in total inventory value this year versus the same period last year.

As there is usually a direct correlation between stock levels and outstanding loans, the loan from the Government at the end of Q3 2013-2014 was $60.47 million compared to $116.91 million at the same time last year. Higher retained earnings combined with lower inventory value resulted in lower loan requirements as of the end of April 2014.

Cash Flows

	Q3 ending April 30		YTD ending April 30	
(in thousands)	2014	2013	2014	2013
Cash flows from (used in) operating activities	$ (11,649)	$ (46,762)	$ 59,132	$ 11,849
Cash flows from (used in) financing activities	$ 9,310	$ 46,348	$ (61,854)	$ (10,363)
Net increase in cash (bank overdraft)	**$ (2,339)**	**$ (414)**	**$ (2,722)**	**$ 1,486**
Net cash (bank overdraft) at beginning of period	$ 812	$ 240	$ 1,195	$ (1,660)
Net bank overdraft at end of period	**$ (1,527)**	**$ (174)**	**$ (1,527)**	**$ (174)**

The CDC's closing bank cash position for the end of the Q3 2013-2014 was an overdraft of $1.53 million compared to the overdraft of $0.17 million for the same period in the previous year. This represents a year-over-year decrease in net cash position of $1.35 million.

Cash flows from operating activities

For YTD ending April 30, 2014, cash flows from operating activities resulted in net inflows of $59.13 million compared to net inflows of $11.85 million for the same period ending April 30, 2013. This increase was due to greater cash receipts from customers as well as a decrease in cash paid to suppliers as a result of lower purchases of butter compared to the same period last year.

Net cash outflows from operating activities during Q3 2013-2014 was $11.65 million compared to net cash outflows of $46.76 million during Q2 2012-2013. The change is due to a decrease in purchases of butter which reduced the cash outflows to suppliers compared to the same quarter last year.

Cash flows from financing activities

For YTD ending April 30, 2014, financing activities involved a net outflow of $61.85 million compared to a net outflow of $10.36 million for the same period ending April 30, 2013. CDC's financing is directly related to its selling and purchasing activities as the loan from the Government of Canada fluctuates daily depending on the cash position at the end of the day. Greater cash outflows this year were a result of lower borrowing needs due to a decrease in butter purchases.

Net cash inflows from financing activities were $9.31 million for Q3 2013-2014 compared to net inflows of $46.35 million for Q3 2012-2013. This variance can be attributed to the fact that, as mentioned above, stocks were lower in Q3 2013-2014 compared to the same period last year which has a direct impact on our financing activities.

3. Outlook against the Corporate Plan Summary

The key factors that may impact the budget indicated in the CDC's Corporate Plan Summary are total production of industrial milk, domestic requirements, support prices, and world market conditions for the sale of dairy products. Any significant changes in the assumptions will affect the budgeted results.

In the third quarter, milk production continued to decrease compared to last year. Milk supply is now below demand for the first time since July 2011. CDC butter stocks are lower than last year as milk is needed to supply the market for fresh products. Industrial milk production is expected to finish the year at 196.4 M kg of butterfat, which is lower than what was forecasted in the Corporate Plan Summary (198 M kg).

Canadian requirements are expected to end the dairy year around 197.5 M kg of butterfat, which is higher than the forecast in the Corporate Plan Summary (194 M kg). On February 1, support prices have increased from $7.3379 to $7.4046 per kg in the case of butter and from $6.4170 to $6.4754 per kg in the case of skim milk powder. This is slightly lower than the assumptions used to prepare the financial statements of the Corporate Plan Summary for dairy year 2013-2014 however, the CDC expects no significant impact on its results.

World prices have been high since the beginning of the dairy year because of weaker production in Western Europe and Oceania. These strong prices allowed the CDC to export large quantities of skim milk powder at relatively good prices.

4. Appropriations

The following table reconciles the appropriations received and disbursed.

	Q3 ending April 30			YTD ending April 30		
(in thousands)	2014	2013	$ change	2014	2013	$ change
Opening Balance	$ -	$ -	$ -	$ -	$ -	$ -
Parliamentary appropriations	$ 790	$ 956	$ (166)	$ 2,981	$ 3,025	$ (44)
Amount disbursed	$ (790)	$ (956)	$ 166	$ (2,981)	$ (3,025)	$ 44
Ending Balance	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**

These appropriations were granted via the Main Estimates and Treasury Board Vote 30 – Paylist requirements. Parliamentary appropriations are used to fund part of the CDC's administrative expenses. The remainder of the CDC's administrative expenses are funded by dairy producers, commercial operations, and the market place.

Government of Canada funding for administrative expenses is appropriated to the CDC based on the Government fiscal year (April to March) while the use of these funds is presented in these statements on a dairy year (August to July) basis. The CDC does present the use of its appropriations on a Government fiscal year basis in the Public Accounts of Canada.

5. Risk Management

There have been no changes in the risk that the CDC faces since the publication of the CDC's 2012-2013 Annual Report.

6. Significant Changes

The following significant changes in operations, personnel, objectives, industry initiatives and programs have occurred between February 1 and April 30, 2014, compared to the Corporate Plan Summary.

Operations, industry initiatives and programs	There has been no significant change in operations, industry initiatives or programs since the last quarterly financial statements.
Personnel	There has been no significant change in personnel since the last quarterly financial statements.
Objectives	There have been no significant changes in objectives compared to the Corporate Plan Summary.
Governing Board	There have been no changes to the governing board since the last quarterly financial statements.

Management Responsibility for Financial Statements

Management is responsible for the preparation and fair presentation of these quarterly financial statements in accordance with the requirements of International Accounting Standard 34: *Interim Financial Reporting* (IAS 34), and for such internal controls as management determines are necessary to enable the preparation of quarterly financial statements that are free from material misstatement. Management is also responsible for ensuring all other information in this quarterly financial report is consistent, where appropriate, with the quarterly financial statements. These statements are unaudited and have not been reviewed by an external auditor.

Based on our knowledge, these unaudited quarterly financial statements present fairly, in all material respects, the financial position, results of operations and cash flows of the corporation, as at the date of, and for the periods presented in the quarterly financial statements.

Notes to Unaudited Financial Statements – April 30, 2014

1. Authority and objectives

The Canadian Dairy Commission (CDC) was established in 1966 through the *Canadian Dairy Commission Act*. It is a federal Crown corporation named in Part I, Schedule III and Schedule IV to the *Financial Administration Act* and is not subject to the provisions of the *Income Tax Act.* It is an agent of Her Majesty the Queen in right of Canada and reports to Parliament through the Minister of Agriculture and Agri-Food.

The objectives of the CDC are to provide efficient producers of milk with the opportunity of obtaining a fair return for their labour and investment and to provide consumers of dairy products with a continuous and adequate supply of dairy products. To achieve its objectives, the CDC works closely with the Canadian Milk Supply Management Committee (CMSMC), which it chairs, as well as with provincial governments and provincial milk marketing boards. This collaboration is framed by federal-provincial agreements.

The CDC is partly funded by parliamentary appropriations. This is supplemented by funding from milk producers and the market, as well as by the CDC's own commercial operations.

2. Basis of preparation

Statement of compliance

The CDC prepared these interim financial statements in accordance with the Treasury Board of Canada Standard on Quarterly Financial Reports for Crown Corporations and IAS 34 – *Interim Financial Reporting*, using International Financial Reporting Standards (IFRS).

The financial statements were approved and authorized for issue by the CDC Board of Directors on June 18, 2014.

Basis of presentation

The financial statements have been prepared on a historical cost basis, as set out in the accounting policies below, except as permitted by IFRS and otherwise indicated within these notes.

Reporting period

The CDC reports on a dairy year basis which starts August 1 and ends July 31.

The reporting period for these interim financial statements and notes thereto is August 1, 2013 to April 30, 2014. There financial statements present results for the third quarter (Q3 2013-2014) of operations for the CDC's dairy year ending July 31, 2014.

Key sources of estimation uncertainty

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the year. Valuation of inventories, post-employment benefits, and derivatives are the most significant items where estimates are used. Actual amounts could differ significantly from the current estimates. These estimates are reviewed annually and as adjustments become necessary, they are recognized in the financial statements of the period in which they become known.

Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the functional and presentation currency of the CDC.

3. Significant accounting policies

Cash

Cash includes funds on deposit at financial institutions.

Financial instruments

Financial assets and financial liabilities are initially recognized at fair value. Their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics, and the CDC's designation of such instruments.

Classifications:

Trade and other receivables…..…………	Loans and receivables
Bank overdraft……………….…………...	Financial liabilities measured at amortized cost
Trade and other payables……...................	Financial liabilities measured at amortized cost
Loans from the Government of Canada …	Financial liabilities measured at amortized cost
Derivative assets and liabilities…………….	Financial assets or liabilities measured at fair value through profit or loss (FVTPL)

Loans and receivables

Financial liabilities measured at amortized cost

Financial liabilities measured at amortized cost are measured at amortized cost using the effective interest method.

Financial assets or liabilities measured at FVTPL

Financial assets or liabilities classified as FVTPL are measured at fair value at the statement of financial position date with changes in fair value recorded in profit or loss on the statement of operations and comprehensive income.

Transaction costs

All transaction costs in respect of financial instruments classified as loans and receivables or financial liabilities measured at amortized cost are capitalized in the period in which they are incurred. All transaction costs in respect of financial instruments classified as financial assets or liabilities measured at FVTPL are expensed in the period in which they are incurred.

Derivative financial instruments

The CDC uses derivative financial instruments such as forward contracts to counter the adverse movements in foreign exchange related to purchases and sales denominated in foreign currencies, including anticipated transactions, as well as to manage its cash balances and requirements. The CDC's policy is not to utilize freestanding derivative financial instruments for trading or speculative purposes.

The CDC does not designate its foreign exchange forward contracts as hedges of underlying assets, liabilities, firm commitments or anticipated transactions and accordingly does not apply hedge accounting. As a result, foreign exchange forward contracts are recorded on the statement of financial position at fair value as an asset when the contracts are in a gain position and as a liability when the contracts are in a loss position. Changes in fair value of these contracts are recognized as gains or losses within "Other charges (recoveries)" on the statement of operations and comprehensive income.

Inventory

Inventory is recorded at the lower of cost, which is purchase cost, or estimated net realizable value. Cost is determined on a first-in, first-out basis except for Plan B inventories where cost is determined based on specific identification. Write-downs to net realizable value are reversed when there is a subsequent increase in the value of inventory up to a maximum of the purchase cost. The reversal is recognized as a reduction to cost of sales and an increase to the net value of inventory in the year in which it occurs.

Equipment

Equipment is recorded at cost less accumulated depreciation. Cost includes all measurable expenditures directly attributable to the acquisition and installation of the equipment.

Depreciation is charged to “Other charges (recoveries)” on the statement of operations and comprehensive income and begins when the equipment is available for use by the CDC. Depreciation is calculated on a straight-line basis over the estimated useful life of the asset less estimated residual value as follows:

Generator …………………………10 years
Computer equipment …………….. 3-5 years

Equipment is reviewed annually for indications of impairment or changes in estimated future economic benefits. If such impairment or change exists, the carrying value would be adjusted accordingly.

Intangible asset

Software

Internally developed application software is stated at cost less accumulated amortization. Cost includes all measurable expenditures directly attributable to the development of the software including employees’ salaries, consultant fees and other identifiable costs specific to the project.

Amortization begins when the software is available for use by the CDC. Amortization of the intangible asset is charged to “Other charges (recoveries)” on the statement of operations and comprehensive income on a straight-line basis over its estimated useful life of ten years.

Software is reviewed annually for indications of impairment or changes in estimated future economic benefits. If such impairment or change exists, the carrying value would be adjusted accordingly.

Distributions to (recoveries from) provincial milk boards and agencies

Distributions to (recoveries from) provincial milk boards and agencies represent gross profit (loss) on sales excluding imported butter. Distributions to (recoveries from) provincial boards and agencies are recorded as expense (revenue) in the year that they are determined.

Revenues

Sales revenues

Domestic and export sales revenues are recognized when product is shipped.

Funding from milk pools

Funding from milk pools is recognized as revenue in the period the services are rendered.

Funding from the Government of Canada

Funding from the Government of Canada is recognized as revenue in the period the expenses are incurred.

Audit services

Revenues from audit services are recognized in the period the services are rendered.

Cost of sales

The CDC purchases all butter and skim milk powder tendered to it at either the Canadian support price or at other prices established by the CDC, depending on the intended resale markets, except for a portion of butter imported by the CDC at international market price. These costs are charged to cost of sales when the goods are shipped to customers.

Foreign currency translation

All foreign currency transactions are translated into Canadian dollars at the exchange rate in effect on the transaction date.

Trade receivables and payables in foreign currencies are adjusted to reflect the exchange rate in effect at the statement of financial position date. Any corresponding gains or losses are recognized in "Export sales revenue" for receivables and "Cost of goods sold – domestic" for payables on the statement of operations and comprehensive income.

Most sales and purchases in foreign currencies have corresponding foreign exchange forward contracts (see "Derivative financial instruments" above and Note 14. *Financial Instruments – Currency risk*).

Employee benefits

Pension benefits

Substantially all of the employees of the CDC are covered by the public service pension plan (the "Plan"), a contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the CDC to cover current service cost. Pursuant to legislation currently in place, the CDC has no legal or constructive obligation to pay further contributions with respect to any past service or funding deficiencies of the Plan. Consequently, contributions are recognized as an expense in the year when employees have rendered service and represent the total pension obligation of the CDC.

Post-employment benefits

Eligible employees are entitled to post-employment benefits as provided for under labour contracts and conditions of employment. The cost of these benefits is accrued as employees render the services necessary to earn them. The obligation relating to the benefits earned by employees is calculated by management.

Scholarship program

Scholarship program monies are expensed in the year in which educational institutions meet specified eligibility criteria and the agreements are approved.

Future accounting standards (accounting standards issued but not yet applied)

Certain new accounting standards and amendments have been published which are not required to be adopted for the current reporting period. As of the date of these financial statements, the following applicable standards and amendments, assessed as having a possible impact on CDC, were issued but not yet effective:

- IAS 32 - *Financial Instruments: Presentation* was amended to provide additional guidance related to the offsetting of financial assets and financial liabilities presented on a net basis on the Statement of Financial Position. The clarifying amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014. The CDC does not expect any significant impacts on its financial statements resulting from the adoption of the amendments to IAS 32.

- IFRS 9 – *Financial Instruments* provides requirements for classifying and measuring financial assets and liabilities. This standard is the first in a three-phase project in progress by the IASB to replace IAS 39 – *Financial Instruments*: *Recognition and Measurement* in its entirety. The new standard is effective for annual periods beginning on or after January 1, 2018. The CDC has not yet determined the impact of the adoption of IFRS 9.

- IFRS 7 – *Financial Instruments: Disclosures* requires disclosures about the initial application of IFRS 9 with effective date on or after January 1, 2018. The amendments are to be applied retrospectively. The CDC has not yet determined the impact of the adoption of IFRS 7.

- IAS 36 – *Impairment of Assets* provides clarification of disclosures required for the recoverable amount for non-financial assets with effective date on or after January 1, 2014. The amendments are to be applied retrospectively. The CDC does not expect any impact on its financial statements resulting from the adoption of the amendments to IAS 36.

(In thousands of Canadian dollars, unless otherwise indicated)

4. Inventory

Under section 9(1) of the *Canadian Dairy Commission Act*, the CDC operates domestic seasonality programs, which include the purchase and sale of Plan B inventory (butter and skim milk powder). Under Plan B, as set out in agreements with manufacturers, the CDC purchases products from manufacturers. While manufacturers are contractually obligated to repurchase Plan B inventory within the course of the next dairy year at the prevailing support prices, the CDC is not contractually bound to sell to the manufacturers. However, the CDC has customarily honoured all manufacturers' requests.

Inventory in dollars:

	April 30, 2014	July 31, 2013
Plan B:		
Butter	$ 48,540	$ 96,645
Skim milk powder	8,772	8,158
Other butter	18,908	23,950
Other skim milk powder	26,758	29,662
	102,978	158,415
Less: allowance for inventory write-down	(91)	(724)
Total net realizable value	$ 102,887	$ 157,691

Inventory in tonnes:

	April 30, 2014	July 31, 2013
Plan B:		
Butter	6,575	13,207
Skim milk powder	1,355	1,278
Other butter	3,255	4,098
Other skim milk powder	15,250	22,139

Inventory expensed in the third quarter was $50.72 million (Q3 2012-2013: $48.88 million) and is presented on the statement of operations and comprehensive income in cost of goods sold (domestic and exports).

5. *Equipment*

The carrying value of equipment is determined as follows:

	Balance July 31, 2013	Additions	Disposals	Balance April 30, 2014
Cost	$ 67	-	-	$ 67
Accumulated depreciation	$ 19	6	-	$ 25
Carrying amount	$ 48			$ 42

(In thousands of Canadian dollars, unless otherwise indicated)

6. Intangible asset

The carrying value of the intangible asset is determined as follows:

	Balance July 31, 2013	Additions	Disposals	Balance April 30, 2014
Cost	$ 183	111	-	$ 294
Accumulated amortization	$ -	2	-	$ 2
Carrying amount	$ 183			$ 292

Intangible asset represents software being developed in-house to meet specific operational needs unique to the CDC. The new software program was made operational in April 2014 at which time amortization charges to profit and loss began.

7. Bank overdraft

The CDC has established a line of credit with a member of the Canadian Payments Association. The CDC has been granted the authority to establish this line of credit by the Minister of Finance up to a maximum of $50 million for advancing funds to the provincial milk marketing boards and agencies. On April 30, 2014 the available line of credit was $5 million (July 31, 2013: $5 million).

The bank overdraft incurred under the CDC's line of credit is due on demand and bears interest at prime, which as at April 30, 2014 was 3.00% per annum (July 31,2013: 3.00%).

8. Loans from the Government of Canada (Consolidated Revenue Fund)

Loans from the Government of Canada's Consolidated Revenue Fund, to a maximum of $165 million (July 31, 2013: $165 million), are available to finance operations. Individual loans are repayable within one year from the date the loan is advanced. Principal and accrued interest is repaid regularly during the year when funds are available.

Interest on the loans is at the normal rates established for Crown corporations by the government and based on the latest available yields of comparable Treasury bills plus one-eighth of one percent at simple interest. Interest rates and interest expense were as follows:

	Three months		Nine months	
Interest rates	Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
Low	0.95%	1.06%	0.95%	1.05%
High	1.08%	1.21%	1.18%	1.25%
Interest expense	$ 130	$ 254	$ 598	$ 773

(In thousands of Canadian dollars, unless otherwise indicated)

9. Capital disclosures

The CDC's capital consists of its loans from the Government of Canada (see Note 8) and retained earnings. As of April 30, 2014 these accounts totaled $60.47 million (July 31, 2013: $122.32 million) and $31.90 million (July 31, 2013: $10.99 million) respectively. The CDC is not subject to any externally imposed capital requirements.

The CDC's primary objective in managing capital is to ensure that it has sufficient liquidity in order to settle its financial obligations as they become due and to fund programs for the benefit of the dairy industry. The CDC adjusts its capital management approach on an ongoing basis as the amounts fluctuate during the course of the year. The CDC does not utilize any quantitative measures to monitor its capital. There were no changes in the CDC's approach to capital management or the definition thereof as compared to the previous year.

10. Foreign exchange gains and losses

Export sales include amounts representing realized net gains or net losses arising from currency translation relating to transactions incurred in foreign currencies.

As well, domestic cost of sales include amounts representing realized net gains or net losses arising from currency translation relating to import purchase transactions incurred in foreign currencies.

	Three months		Nine months	
Net gain (loss)	Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
Export sales	$ (677)	$ (315)	$ (880)	$ (494)
Domestic cost of sales	$ 13	$ -	$ 24	$ 15

11. Funding from milk pools

As acting agent in carrying out administrative functions of the Comprehensive Agreement on Pooling of Milk Revenues (a federal-provincial agreement), the CDC collects and redistributes producer market returns. For these services, the CDC receives from producers an annual fixed fee which offsets its cost for the administration of the agreement as well as the estimated carrying charges for normal levels of butter inventory. Furthermore, the CDC is reimbursed for other direct costs as set out in the agreement including carrying charges for surplus butter inventories.

(In thousands of Canadian dollars, unless otherwise indicated)

12. Funding from the Government of Canada

Funding of the CDC's administrative expenses is shared among the federal government, dairy producers, commercial operations and the market place.

Government of Canada funding of total administrative expenses is as follows:

	Three months		Nine months	
	Q3 2013- 2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
Funded by Government	$ 790	$ 956	$ 2,981	$ 3,025
Total administrative expenses	$ 1,628	$ 1,713	$ 5,392	$ 5,560

13. Salaries and employee benefits

Salaries and employee benefits includes:

	Three months		Nine months	
	Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
Salaries expense	$1,021	$1,097	$3,403	$3,470
Pension contributions	142	138	464	510
Medical insurance expense	44	54	149	165
Others	46	50	111	114
Total	$1,254	$1,339	$4,126	$4,259

Pension plan

Substantially all of the employees of the CDC are covered by the public service pension plan (the "Plan"), a contributory defined benefit plan established through legislation and sponsored by the Government of Canada. Contributions are required by both the employees and the CDC. The President of the Treasury Board of Canada sets the required employer contributions based on a multiple of the employees' required contribution. The general contribution rate effective for the quarter ended April 30, 2014 was 1.45 times the employee's rate (1.74 times for the prior year).

The Government of Canada holds a statutory obligation for the payment of benefits relating to the Plan. Pension benefits generally accrue up to a maximum period of 35 years at an annual rate of 2% of pensionable service multiplied by the average of the best five consecutive years of earnings. The benefits are coordinated with Canada/Québec Pension Plan benefits and they are indexed to inflation.

(In thousands of Canadian dollars, unless otherwise indicated)

Post-employment benefits

The CDC provides post-employment benefits to its eligible employees based on years of service and final salary. This benefit plan is not pre-funded and thus has no assets, resulting in a plan deficit equal to the accrued benefit obligation. Benefits are paid from future appropriations and other sources of revenue.

As a result of new government policy, post-employment benefits will no longer be accrued for new and existing employees. The remaining balance represents the amounts not yet cashed out by employees. In accordance with this new policy, employees' years of service were frozen on the day their respective collective agreements were signed and any increase or decrease in obligation is due to a variation in final salary.

Information about this benefit plan, measured as of the statement of financial position date, is as follows:

	April 30, 2014	July 31, 2013
Accrued benefit obligation, beginning of the year	$ 440	$ 596
Benefits paid during the period	(224)	(142)
Increase (decrease) in obligation	4	(14)
Accrued benefit obligation, end of period	$ 220	$ 440

Of the total period end obligation, $0.07 million (July 31, 2013: $0.30 million) is estimated by the CDC to be payable within the next year and has been presented as a current liability on the statement of financial position under "Other liabilities".

14. Financial instruments

In the course of carrying out its ongoing operations, the CDC faces risks to its financial assets and financial liabilities. The CDC's exposure to risk from its use of financial instruments is presented below along with the CDC's objectives, policies and processes for managing risk.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates, will affect the CDC's income or the value of its holding of financial instruments.

Currency risk

The CDC operates internationally, exposing itself to market risks from changes in foreign exchange rates. The CDC partially manages these exposures by contracting only in U.S. dollars or Canadian dollars. The CDC's foreign exchange risk management includes the use of foreign currency forward contracts to fix the exchange rates on certain foreign currency exposures. The CDC periodically enters into foreign exchange forward contracts to manage exposure to exchange rate fluctuations between Canadian and U.S. dollars.

(In thousands of Canadian dollars, unless otherwise indicated)

As of the statement of financial position date, the notional value of the CDC's outstanding forward exchange contracts totaled $34.64 million Canadian equivalent (July 31, 2013: $20.33 million Canadian equivalent). These contracts will mature over the period ending September 5, 2014. The maturity dates of the forward exchange contracts correspond to the estimated dates when the CDC expects to receive the foreign currency proceeds arising from export sales contracts or when payment for purchases in foreign currencies are due.

The fair value of the CDC's derivative financial instruments is determined using the Bank of Canada's published foreign exchange rates as of the statement of financial position date. The CDC's foreign exchange forward contracts as of the statement of financial position date were as follows:

		April 30, 2014		July 31, 2013	
Currency sold	Currency purchased	In USD	In CAD	In USD	In CAD
USD	CAD	$ 21,990	$ 24,101	$ 16,730	$ 17,185
CAD	USD	$ 9,388	$ 10,543	$ 2,973	$ 3,144

"Other charges (recoveries)" under operating expenses on the statement of operations and comprehensive income include $1.22 million representing net gains incurred during the current quarter (Q3 2012-2013: net gains of $0.14 million) arising from the determination of unrealized fair value remeasurements of the CDC's derivative financial instruments.

The CDC's exposure to foreign currency risk was as follows, based on Canadian dollar equivalent amounts:

In CAD	April 30, 2014	July 31, 2013
Trade receivable	$ 2,093	$ 2,688
Trade payable	0	(343)
Net derivative asset (liability)	334	361
Net exposure	$ 2,427	$ 2,706

Based on the net exposure as of April 30, 2014, and assuming that all other variables remained constant, had the Canadian dollar appreciated 10% against the US dollar, net income for the quarter ended April 30, 2014 would have decreased by $1.15 million (Q3 2012-2013: decreased by $0.72 million). Conversely, a 10% weakening in the Canadian dollar against the US dollar would have had the equal but opposite effect for the same quarter.

Interest rate risk

Interest rate risk is the risk that a financial asset containing a fixed interest rate component decreases in fair value with a rise in interest rates or that a financial liability with a floating interest rate component results in increased cash outflow requirements as a result of an increase in interest rates. Other than the line of credit, for which interest expense varies as a function of prime, and loans from the Government of Canada, which vary as a function of the yield on comparable Treasury bills, the CDC does not have any other such financial assets or liabilities exposed to this risk. The CDC's exposure to interest rate risk is not significant given its low interest bearing loans.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or currency risk. The CDC is not significantly exposed to this type of risk.

Liquidity risk

Liquidity risk is the risk that the CDC will not be able to meet its financial obligations as they fall due. As of the statement of financial position date, virtually all of the CDC's assets and liabilities were current and the CDC had a current ratio equal to 1.42 (July 31, 2013: 1.07). In managing liquidity risk, the CDC has access to additional borrowings for commercial operations from the Government of Canada in the amount of $104.53 million as of April 30, 2014 (July 31, 2013: $42.68 million) as well as $3.32 million (July 31, 2013: $4.93 million) on its line of credit for the pooling of market returns.

Credit risk

Credit risk is the risk of loss due to a customer failing to meet its financial obligations to the CDC. Maximum credit exposure is the carrying amount of the pooling and trade receivable balances, net of any allowance for losses. The CDC manages this risk using several strategies which include selling product on a "payment first" basis, securing of bank guarantees and obtaining letters of credit. As of April 30, 2014 and July 31, 2013 the CDC did not have an allowance for doubtful accounts and all trade receivables were current.

The CDC is exposed to credit risk when entering into foreign exchange contracts wherein the counterparty fails to perform an obligation as agreed upon, causing a financial loss. Maximum credit exposure is the notional amount of the derivative asset. The CDC manages this exposure to credit risk by entering into foreign exchange contracts only with major Canadian financial institutions. To date, no such counterparty has failed to meet its financial obligation to the CDC.

Fair values

The carrying value of cash, trade and other receivables, bank overdraft, and trade and other payables approximates their fair values due to the immediate or short-term maturity of these financial instruments. As of the statement of financial position date, no amounts representing changes in fair value of these financial instruments have been recorded in the statement of operations and comprehensive income.

(In thousands of Canadian dollars, unless otherwise indicated)

Fair value hierarchy

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy, which for the CDC is only relevant in the context of derivative financial instruments, has the following levels:

Level 1: valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value measurement of the CDC's derivative financial instruments is classified as level 2 (July 31, 2013: level 2) in the fair value hierarchy. Changes in valuation methods may result in transfers into or out of levels 1, 2, and 3. For the reporting periods ended April 30, 2014 and July 31, 2013, there were no transfers between levels. The fair value of the derivative asset is measured using the Bank of Canada closing exchange rate. The fair value of the derivative liability is measured using the Scotia Bank closing exchange rate. These rates were 1.0960 and 1.1230 at April 30, 2014 (1.0272 and 1.0575 at July 31, 2013)

Derivative asset – Forward exchange contract

Level 1		**Level 2**		**Level 3**	
April 2014	July 2013	April 2014	July 2013	April 2014	July 2013
-	-	$334	$361	-	-

Derivative liability – Forward exchange contract

Level 1		**Level 2**		**Level 3**	
April 2014	July 2013	April 2014	July 2013	April 2014	July 2013
-	-	-	-	-	-

Offsetting of Financial Instruments in the Statement of Financial Position

Derivative assets and liabilities are comprised of forward exchange contracts entered into by the CDC for the purpose of hedging its sales and purchases in foreign currency in order to better manage its currency risk.

(In thousands of Canadian dollars, unless otherwise indicated)

The following tables present derivative assets and liabilities that are offset as at April 30, 2014.

Derivative asset (forward exchange contracts), in Canadian dollars:

	April 30, 2014		July 31, 2013	
	Gross amount	Amount offset	Gross amount	Amount offset
Sales of USD				
Asset	$ 24,250	$ 24,250	$ 17,500	$ 17,500
Liability offset	(24,101)	(24,101)	(17,185)	(17,185)
Net offset of sales of USD		$ 149		$ 315
Purchases of USD				
Asset	$ 10,543	$ 10,543	$ 3 145	$ 3 145
Liability offset	(10,357)	(10,357)	(3 099)	(3 099)
Net offset of purchases of USD		185		46
Total net derivative asset		**$ 334**		**$ 361**

Derivative liability (forward exchange contracts), in Canadian dollars:

	April 30, 2014		July 31, 2013	
	Gross amount	Amount offset	Gross amount	Amount offset
Sales of USD				
Asset	$ -	$ -	$ -	$ -
Liability offset	-	-	-	-
Net offset of sales of USD		-		$ -
Purchases of USD				
Asset	$ -	$ -	$ -	$ -
Liability offset	-	-	-	-
Net offset of purchases of USD		-		
Total net derivative liability		**$ -**		**$ -**

(In thousands of Canadian dollars, unless otherwise indicated)

15. Commitments

a) Industry Initiatives

Summary:	April 30, 2014
Canadian Quality Milk	$ 143
Dairy Research Cluster	750
Matching Investment Fund	202
Scholarship Program	200
Total industry initiatives commitments	$1295

Canadian Quality Milk (CQM)

This program is a quality assurance program for raw milk on farms. The CDC has agreed to partially fund this program under an agreement that commenced August 1, 2007 and was extended to July 31, 2014. Under the terms of the agreement, the CDC will contribute one hundred dollars per eligible farm until July 31, 2014.

Dairy Research Cluster

This Dairy Farmers of Canada initiative enables key industry-led agricultural organizations to mobilize a critical mass of scientific and technical resources to support innovation strategies for enhanced profitability and competitiveness in their sector. The CDC has agreed to partially fund this project under an agreement that commenced April 1, 2014 and expires March 31, 2018. Under the terms of this agreement the CDC will contribute $0.75 million. Payment will be made in 3 installments, $0.25 million in March 2015, $0.25 million in March 2016 and the balance will be paid at the end of the agreement.

Matching Investment Fund

The CDC funds and administers the Matching Investment Fund which provides non-repayable contributions to Canadian-registered companies or food technology centres for product development, on a matching investment basis. The program expires on July 31, 2014. As of April 30, 2014, the CDC has outstanding commitments of $0.20 million that remain to be paid prior to the program expiry.

Scholarship Program

As of August 1, 2011, the CDC funds a graduate Scholarship Program. The CDC grants $3 million in scholarships over five years to participating institutions across Canada. As of April 30, 2014, the CDC has agreements totalling $3 million with participating institutions, of which $0.20 million remains to be paid by July 31, 2016.

(In thousands of Canadian dollars, unless otherwise indicated)

b) Purchase Commitments

As of April 30, 2014, the CDC was committed to purchase certain quantities of butter and skim milk powder. These commitments amounted to approximately $4.99 million (July 31, 2013: $0.77 million) and were fulfilled in May 2014.

c) WTO Tariff Rate Quotas for Butter

Under the terms of the 1994 WTO Agreement, Canada has established tariff rate quotas (TRQ) for a number of dairy products. TRQs are the quantities of products that can enter Canada with little or no tariff. With the support of the industry, the CDC has acted as the receiver of imports of butter under federal permit since 1995 and has directed this product through butter manufacturers to the food sector. The 2014 TRQ for butter remains at 3,274 tonnes. World prices at the time of purchase will determine the total financial commitment.

The total cost to purchase imported butter under the WTO requirement:

Three months		Nine months	
Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
$ 83	$ 190	$ 3,432	$ 6,216

d) Operating Lease

The CDC is committed under a long term lease with Agriculture and Agri-Food Canada for office accommodation ending in March 31, 2017. The lease contains escalation clauses regarding maintenance costs and taxes. This lease may be automatically renewed at the CDC's option for another period of five years with rates possibly revised in order to reflect the rental market value pursuant to Treasury Board's Policy on Real Property.

The minimum lease payments are as follows:

	April 30, 2014	July 31, 2013
Less than one year	$ 351	$ 351
Greater than one year and less than five years	$ 586	$ 938

(In thousands of Canadian dollars, unless otherwise indicated)

16. Related party transactions

Government of Canada entities

The CDC, as per the *Canadian Dairy Commission Act*, is an agent of Her Majesty the Queen in right of Canada. This effectively makes the Government of Canada owner of the CDC, having significant influence over its activities.

The CDC is related in terms of common ownership to all other Government of Canada departments, agencies and Crown corporations. The CDC enters into transactions with these entities in the normal course of business and at normal trade terms. These related party transactions are recorded at their exchange amounts.
In accordance with the disclosure exemption regarding "government related entities", the CDC is exempt from certain disclosure requirements of IAS 24 – *Related Party Disclosures,* relating to its transactions and outstanding balances with:

- a government that has control, joint control or significant influence over the reporting entity; and
- another entity that is a related party because the same government has control, joint control or significant influence over both the reporting entity and the other entity.

Based on this exemption, the CDC has not disclosed any further details of its transactions with the Government of Canada and departments thereof, and all federal Crown corporations not considered to be individually or collectively significant, entered into in the normal course of operations.

Loans from the Government of Canada at terms available to Crown corporations (Note 8), which are recorded at carrying value due to the absence of an observable market rate, represent the CDC's largest related party transaction.

Significant transactions, excluding loans, were with the following related parties:

Government entity	Three months		Nine months	
	Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
Public Works and Government Services Canada (mainly employee benefits – Note 13)	$230	$280	$717	$824
Agriculture and Agri-Food Canada (mainly operating lease – Note 15)	$ 37	$ 75	$343	$323
Other related Government entities	$ 68	$171	$198	$267

(In thousands of Canadian dollars, unless otherwise indicated)

Key management personnel

The CDC's key management personnel are the CEO, the Chairman, the Commissioner, the COO, and the directors.

No loans or other such transactions with key management personnel were outstanding as of April 30, 2014 or July 31, 2013, or occurred at any time during these periods.

The post-employment benefit liability for key management personnel as of April 30, 2014 was $0.09 million (July 31, 2013: $0.21 million) and is divided between "Post-employment benefits" and "Other liabilities" on the statement of financial position.

Compensation of key management personnel:

Three months		Nine months	
Q3 2013-2014	Q3 2012-2013	Q3 2013-2014	Q3 2012-2013
$ 194	$ 179	$ 728	$ 538
