

APPLICATION FOR CITES REGISTRATION OF A CAPTIVE BREEDING OPERATION

CITES Form A1-1 (2014.02.04)

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA AND FLORA

Registration is for captive breeding operations producing animals listed in Appendix I of CITES for commercial purposes.

Note that international trade in wild specimens of Appendix I species for commercial purposes is prohibited. However, under certain conditions, specimens produced by captive breeding operations registered by CITES can be traded for commercial purposes.

Applications for registration of a captive breeding operation will be approved only if sufficient details are provided.

If you need assistance in completing this form, the CITES Management Authority Office can be contacted by email at cites@ec.gc.ca or by telephone at 1-855-869-8670.

Important Notes :

- **Application can be sent by email, regular mail or fax (Send application only once) :**
CITES Permitting Office
Canadian Wildlife Service
Environment Canada
351, St. Joseph Blvd
Gatineau, Quebec K1A 0H3
Email: cites@ec.gc.ca
Fax: 1-855-869-8671
- All applicable sections must be filled out. **Incomplete application forms will not be accepted. Additional information or documents may be requested from the applicant in order to process the application.** The applicant must sign the application form.
- **If the application is approved,** confirmation of registration of the captive breeding operation will be sent by mail to the applicant.

1- NAME AND ADDRESS OF CAPTIVE BREEDING OPERATION

Name of owner :			
Name of manager (if different from owner):			
Name of captive breeding operation:			
Date of establishment of captive breeding operation:			
Street and number :			Post Office Box :
City :		Province/Territory:	
Country :		Postal Code :	
Home Phone :	Work Phone :	Cell Phone :	Fax :
Email address :		Website address :	

2- SPECIES BRED (APPENDIX I ONLY)

Latin Name (genus, species, and sub-species)	Common Name

5-PERCENTAGE OF MORTALITY

Provide information for a minimum of the last five years or since the establishment of the operation.

Year	Specimen	Sex	Age	Origin	Cause of Death

6- REPRODUCTION

Provide documentation showing that each of the species were produced to the second generation (F2) in the captive breeding operation.

If the establishment only produced first generation specimens for the species, provide documentation showing that the breeding methods used are the same or similar to those that have resulted in second generation offspring elsewhere.

Describe the methods used :

7-ANNUAL PRODUCTION

Specify the annual production during the last 5 years (if possible), the current production, and the expected production for the next 3 years.

Year	Total Progeny	Number of Reproductive Females	Reason for Loss or Death

8-NEEDS

<p>Indicate the possibility of future need to increase the number of breeding stock specimens with specimens bred in captivity or from the wild.</p>	
--	--

9-TYPE OF PRODUCT EXPORTED

Indicate the numbers or the quantities exported for each

Year	Live animal	Skin	Meat	Other

10-MARKING

<p>Describe the methods used for marking (bands, tags, tattoos, etc.) used for the breeding stock, the offspring, and the specimens to be exported (skins, meat, live animals, etc.)</p>	
--	--

11-INSPECTION

<p>Describe (if they exist) the inspection procedures currently implemented by the Province or Territory.</p>	
---	--

12-FACILITIES

<p>Describe the facilities used to house the current and future stock as well as the security measures in place to prevent escape or theft of animals. Provide information on the number and size of enclosures used for reproduction and breeding, the facilities used to incubate eggs, the production or provision of food, the availability of veterinary services, and the maintenance of data. (add photos if possible)</p>	
---	--

13-CONSERVATION

<p>Describe (if any) the strategies or activities of the operation that contribute to improved conservation of wild populations of the species.</p>	
---	--
