

Hi My name is Maria Niembro and i have a son with a CFC (Cardio Facial Cutaneous) Syndrome with severe development delay, we are Canadian but my background is Mexican, for the same reason i travel to Mexico every two if not once a year to visit my family, my mother still alive and for her healthy conditions she is unable to travel anymore to visit us!

For That reason I would like to appeal that the program One Person One Fare for domestic approved, will be approve in a near future for International Flights!!!

As mother with special needs child always there are involved a highly demand cost for therapies!

In order to pay the expenses for the trip are very hard!

It will help if you can consider that the traveling is crucial for us, as a immigrants in Canada, we need to reconnect with family and roots from our origin country!

It is difficult not have any family here, i have friends with the same situation and we have been close as a family because of the lack of blood relationship!

Each of us we travel to our countries very often to regain the support and strength that comes from visiting our relatives!

Please consider this petition in order to enhance the program One Person One Fare for domestic and International Flights!!!

Thanks ahead time reviewing this petition!

Sincerely,

Maria Angeles Niembro
