

1. For all companies on the distribution list – that is, the large ILECs, the large cable carriers, and the incumbent wireless carriers:

Provide the following information regarding your company's service volumes and revenues for all mandated wholesale services, including interconnection services:

- a) historical information by year for the past three years, by service and customer, and
- b) forecasts by year for the next three years, by service

ANSWER

TELUS is filing its answer to this interrogatory in confidence with the Commission pursuant to section 39 of the *Telecommunications Act* and Rule 32 of the *CRTC Rules of Practice and Procedure*. The confidential information being provided in Attachments 1 and 3 relate to TELUS' mandated wholesale service revenues and volumes and the name of the legal entities (client base) purchasing these mandated wholesale services. This is sensitive commercial information that TELUS keeps confidential because public disclosure of this information would provide competitors with sensitive detailed information regarding TELUS' revenues, volumes and client base. As a result, competitors could develop business plans to compete with TELUS and its wholesale customers in the market place. As a result, public disclosure of this information would cause TELUS and its wholesale customers specific direct harm. Therefore, TELUS requests that the information for which confidentiality is being claimed not be disclosed on the public record of this proceeding. No abridged versions for Attachments 1 and 3 are provided because they would be meaningless.

Attachment 1 provides the Company's response to sub-questions a) and b) in relation to TELUS' mandated wholesale wireline services, including interconnection services. Attachment 2 provides the list of tariffs which cross references Attachment 1. Attachment 3 provides the Company's response to sub-questions a) and b) regarding TELUS' mandated wholesale wireless service, specifically its GSM-based Roaming Service.
